

In order to convert a fillable PDF file into a non-fillable file, you must **PRINT IT TO PDF**. Please always PRINT fillable PDF files to PDF so that when you send them to Ms. Smith, they are no longer fillable. (Your PDF won't actually be printed; it will be saved as a regular, non-fillable PDF file.) This way no one can change anything you have written into the document once you are finished with it.

**Steps to Saving a Fillable PDF File as a Non-Fillable PDF:**

**STEP 1** Download the document from the website FIRST and THEN fill it out.

**STEP 2** Save the file to PDF as follows:

- ☐ Click on the **Printer** icon.
- ☐ Select Adobe PDF (or your PDF writer) as the printer.
- ☐ Click OK.
- ☐ At the "Save PDF file as" screen, save your document (include your name in the file name).
  
- ☐ Review the converted PDF file to make sure it is no longer fillable.
