Section A - STUDENT	ATRIETE MEDCIAL RIST	FORY QUESTIONAIRE	ATHLETE
PARENTS AND STUDENT AN	SWER THE FOLLOWING MEDICA	L HISTORY QUESTIONS.	
DO YOU OR HAVE YOU EXPE	RIENCED ANY OF THE FOLLOWI	NG CONDITIONS.	
Yes No 1. Concussion o	or had your "bell rung" ?	Yes No 2	5. A dependency on medicine, drugs, or alcohol,
	aches, Dizziness or Fainting spells?		Smoking, tobacco or other substance?
	olving nerves, bones, or spinal cord gers" or "burners"?		6. A dental plate or a broken or chipped tooth? 7. Are you missing any organs? [kidney, eye, etc.]
Yes No 4. Back or Neck in	njury, or low back pain that required	Yes No 2	8. Injury while participating in sports?
medical treatn			9. Surgery or hospitalization not noted above?
Yes No 5. Fractured bone Yes No 6. Significant mus	e or a stress fracture? sculoskeletal injury? i.e. shin splin	Yes No 3	Any illness or injury not already noted?
injuries, stains	s or sprains to knee, ankle, wrist, she	oulder, elbow HAVE YOU	OR A FAMILY MEMBER HAD ANY OF THE FOLLOWING
Yes No 7. Anemia? Yes No 8. Depression?		CONDITION If you provide	S. e approximate date(s) and details; if a family member, specify
Yes No 9. Diabetes?		relation to yo	
Yes No 10. Epilepsy or sei	zures?	Yes No 3	1. Heart murmur?
Yes No 11. A hernia? Yes No 12. Kidney disease	e, Liver disease or hepatitis?		Chest pain or heart palpitations with or without exercise? Fainting or near fainting, passing out?
Yes No 13. Mononucleosis			4. High blood pressure?
Yes No 14. Recurring anxi			5. Irregular heart beat or extra beats?
Yes No 15. Skin problems' Yes No 16. Stomach ulcers		Yes No 3	Excessive or unexplained shortness of breath or excessive fatigue with exercise i.e.Asthma.
Yes No 17. Unusual bleedi		Yes No 3	7. Sudden death without warning before age 50?
Yes No 18. Eating disorder	rs, Weight loss or gain greater than	10 lbs. Yes No 3	8. Other history of Heart problems? i.e. hypertrophic
i.e. bulimia (bi Yes No 19. Asthma or whe	ingeing or vomiting), anorexia nervo	sa	cardiomyopathy or dilated cardiomyopathy, long QT syndrome or Marfan's syndrome
Yes No 20. A pain or press			or Marian's syndrome
	shortness of breath?		HLETES ONLY
Yes No 22. Spitting or coug Yes No 23. A need to take	ghing up blood? any kind of medicine?	Yes No 3	9. Are there any female health related conditions that will affect your participation in athletics?
	cine to enhance athletic ability or str	ength?	your participation in atmetics:
_	·	OTHER CON	IDITIONS THAT MAY EFFECT ATHLETIC COMPETITION?

CONCUSSION INFORMATION SHEET

PARENTS PLEASE KEEP FOR YOUR REFERENCE

A concussion is a brain injury and all brain injuries are serious. They are caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly. In other words, even a "ding" or a bump on the head can be serious. You can't see a concussion and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. If your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

Symptoms may include one or more of the following:

- Headaches
- "Pressure in head"
- Nausea or vomiting
- Neck pain
- Balance problems or dizziness
- Blurred, double, or fuzzy vision
- Sensitivity to light or noise
- Feeling sluggish or slowed down
- Feeling foggy or groggy
- Drowsiness
- Change in sleep patterns

Amnesia

- "Don't feel right"
- Fatigue or low energy
- Sadness
- Nervousness or anxiety
- Irritability
- More emotional
- Confusion
- Concentration or memory problems (forgetting game plays)
- Repeating the same question/comment

Signs observed by teammates, parents and coaches include:

- Appears dazed
- Vacant facial expression
- Confused about assignment
- Forgets plays
- Is unsure of game, score, or opponent
- Moves clumsily or displays incoordination
- Answers questions slowly
- · Slurred speech
- Shows behavior or personality changes
- Can't recall events prior to hit
- Can't recall events after hit
- Seizures or convulsions
- Any change in typical behavior or personality
- Loses consciousness

What can happen if my child keeps on playing with a concussion or returns to soon?

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage athlete will often under report symptoms of injuries. And concussions are no different. As a result, education of administrators, coaches, parents and students is the key for student-athlete's safety.

If you think your child has suffered a concussion

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance. Close observation of the athlete should continue for several hours. The new CIF Bylaw 313 now requires implementation of long and well-established return to play concussion guidelines that have been recommended for several years:

"A student-athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time and for the remainder of the day."

and

"A student-athlete who has been removed may not return to play until the athlete is evaluated by a licensed heath care provider trained in the evaluation and management of concussion and received written clearance to return to play from that health care provider".

You should also inform your child's coach if you think that your child may have a concussion Remember its better to miss one game than miss the whole season. And when in doubt, the athlete sits out.

For current and up-to-date information on concussions you can go to: http://www.cdc.gov/ConcussionInYouthSports/

PARENTS PLEASE KEEP FOR FUTURE REFERENCE
