AP Studio Art 2-D	AP Economics	Science	AP Statistics
AP Biology	AP English Language	AP Psychology	AP U.S. History
AP Calculus	AP English Literature	AP World History	
AP Human Geography	AP American Government		

School Community

Freedom High School (FHS) was opened in 1996 as the second of three comprehensive high schools in the Liberty Union High School District. Students have a full range of academic, extra-curricular, and co-curricular activities. FHS is located in the city of Oakley, a rural-suburban setting that has experienced rapid residential and commercial development over the past decade. Freedom's student population has grown from approximately 1,689 in 2001 to 2,567 in 2019. Despite increased growth and challenges, FHS continues to raise academic achievement for all students, while narrowing the gap for our five targeted sub-groups: Hispanic, English Language Learners (ELL), Special Education (SPED), African American, and Socio-Economically Disadvantaged (SED) students.

Student Life

With an active Associated Student Body, 40+ school clubs and special interest organizations, students have a wide variety of opportunities to become active in their school community. Although volunteer hours are not a requirement for graduation, most students contribute to our community through clubs, organizations, and various social causes. Freedom students also participate in a full range of competitive athletics.

Freedom High School recognizes our students academically through Honor Roll, and those students who are members of National Honor's Society and the California Scholarship Federation.

Professional Learning Community (PLC)

Students are randomly assigned to one of the four (4) building communities at FHS. The building communities feature common core teachers in Math, English, Science, as well as an Assistant Principal, Counselor, and Secretary. This structure allows students to experience a smaller school within a large school setting and a more personal and supportive educational community. FHS embraces the PLC model, which encourages varying groups of staff to collaborate and work towards a common goal of improving student-learning outcomes.

Academy Program

There are three academies in place for the 2020-2021 school year, each with a particular focus and career path:

- STEM (Science Technology, Engineering and Mathematics)
- PHD (Professional Human Development)
- Communications

The Academy goals are to provide students, at the completion of high school, the option of entering the job market, enrolling at a community college/technical school, or pursuing collegiate studies with a clear articulated academic background in a particular area.
