

Learning Targets:

- I can use the signs and integers of the coordinates in an ordered pair to find its location in a coordinate plane.

- I can graph points in all four quadrants of the coordinate plane to solve real-world and mathematical problems.

We have been working on vertical and horizontal numberlines...now we are going to see what happens when they intersect at zero!

-Horizontal number line is called the **x-axis**
 -Vertical number line is called to **y-axis**

Ordered pairs are used to locate points in a coordinate plane.

y-axis (vertical axis)

x-axis (horizontal axis)

origin (0,0)

Ordered Pairs are made of two integers:

- The first number is how far you go left or right (x).
- The second number is how far you go up or down you (y).

They are written like this (x, y)

In an ordered pair, the first number is always the x-coordinate. The second number is the y-coordinate.

Graph. (-3, 2)

The x-axis and y-axis separate the coordinate plane into four sections, called **quadrants**.

Quadrant – (Quad = 4) the four sections that are created when the number lines intersect.

- Quadrant One (I) – Top right; x and y are both positive
- Quadrant Two (II) – Top left; x is negative, y is positive
- Quadrant Three (III) – Bottom Left; x and y are both negative
- Quadrant Four (IV) – Bottom right; x is positive, y is negative

What is the ordered pair for A?

1. (3, 1)
2. (1, 3)
3. (-3, 1)
4. (3, -1)

What is the ordered pair for B?

1. (3, 2)
2. (-2, 3)
3. (-3, -2)
4. (3, -2)

What is the ordered pair for C?

1. (0, -4)
2. (-4, 0)
3. (0, 4)
4. (4, 0)

What is the ordered pair for D?

1. (-1, -6)
2. (-6, -1)
3. (-6, 1)
4. (6, -1)

Write the ordered pairs that name points A, B, C, and D.

- A = (1, 3)
- B = (3, -2)
- C = (0, -4)
- D = (-6, -1)

Practice: Please use the graphing paper on the next slide for your answer. Scan or send a picture to boschl@luhsd.net

Plot each of the following points and label them with the letter:

- | | |
|------------|------------|
| A (3, 4) | F. (1,4) |
| B (-5, 2) | G. (-2,-1) |
| C (3, -2) | H. (6,-2) |
| D (-1, -5) | I. (-3,5) |
| E (-4,-3) | J. (0,0) |
