

Distance Learning Assignment

Kumagai- Periods 1-8

Week of: 4/28 to 5/1

Read through the first page. This covers Intervals (the space between two notes).

It is important to remember that when counting intervals, you always need to count the first note as Note #1, then count the lines and spaces up/down to the next note.

A Melodic Interval is an interval of two notes that happen one after the other. A Harmonic Interval involves two notes that happen at the same time (they will look like they're stacked in the same line).
