

AP Physics 1 Pennington

Week 6,7,8 of May 11th to May 29

You are assigned EDpuzzle videos on static and current electricity

They are updated and ready for your watching and answering the embedded questions.

This is new material and you will not be tested on this material.

I'm purposefully keeping the assignment lite because I know many of you have multiple AP tests this week.

Wednesday May 27th at 11:30, I will have an optional zoom to check in with you and see how you felt about the AP exam

Email me that morning May 27th before 11:15 and I will give you the zoom ID and password.

Week 9 is for turning in books. There are zero new assignments. Cut off for all late work is June 3rd 9:00 AM PST.

Mr. P
