

CREATE A DISEASE

(USE YOUR CHAIN NOTES)

Your Poster (the "poster" can be on created on paper 8.5X11 or if you have a cool online way to make this assignment like google slides or something, that would be great too, however you want to do it. It can be in the form of a list, comic strip, chain, etc. Remember it is a **fake** disease. Email a picture to me).

Your disease must pass from person to person!

Must Include:

- 1. Give your disease a creative and unique name**
- 2. Agent – (Pathogen):** pick one of the examples from the chain of infection notes
- 3. Reservoir – (Host):** done for you...it must be human
- 4. Place of Exit:** pick one or more from the chain notes...but it needs to make sense with transmission
- 5. Transmission:** explain how the disease goes from person to person, this is the action (sneeze, kiss, sex, animal bite etc.) Remember it needs to make sense with the places of exit/entry.
- 6. Place of Entry:** pick one or more from the chain notes...but it needs to make sense with transmission.
- 7. Susceptible Host:** who is at risk for getting this disease and why
- 8. Treatment:** what helps make the symptoms better or go away...or maybe it's not curable
- 9. Signs & Symptoms:** bullet points will be okay here
- 10. Prevention:** prevention must also make sense with transmission and places of exit/entry

◆ ***Include G Rated Drawings***

◆ ***Color and Creativity***
