

# CYBER SECURITY

## 2021 Summer CyberCamps

Bay Area Community Colleges, once again, are supporting week-long summer Virtual CyberCamps in June and July. Camps feature three whole weeks of cybersecurity training at three levels: Introductory, Intermediate, and Advanced. There will be separate camps offered for both High School and Community College students. CyberCampers will learn about cyber hygiene, ethics, systems administration, security audits, cryptography, digital and network forensics, and web application exploitation. The Ideal Camp Candidates are: current (2020 -21) **8th-12th** graders and community college students with little to no cybersecurity experience.

**REGISTRATION** – <http://2021campregistration.baycyber.net/>

### Participating Colleges

Cabrillo College	Monterey Peninsula College
City College of San Francisco	Napa Valley College
College of Marin	Oklahoma College
College of San Mateo	San Jose City College
Contra Costa College	Santa Rosa Junior College
