

AP Physics 1 Pennington

Week of May 4th (be with you), 2020 (5th weekly assignments)

You should have in week 4 after doing your Week 4 quiz you should have gone to see the solutions on youtube channel Math and Physics tutor (I chose these because I want you to get feedback... after you attempt them and have you practice uploading files to the site.)

You were assigned an edpuzzle last week. Only ½ of you have completed it. It is still open

Assignment 1: Goto MyAP and do the assigned “Quiz week 5”
combo FRQ and MC

I will post scoring guides to the week 4 quiz Tuesday after I have scored your FRQs (for completion).

Assignment 2: goto Epuzzle and watch the AP 2020 exam video and answer the question(s).

You should be getting an email from AP Central on how to log in and take the test. I will be checking this week that you have been practicing the FRQ upload. Don't get caught not knowing how to do your upload.
